

# iDEA 2021: Planet Health and Hope

The logo for iDEA 2021 features the word 'idea' in blue lowercase letters, with the 'i' having a green dot. The '21' is in green, with the '2' having a blue dot. A green period follows the '1'.

PLANET, HEALTH AND HOPE

—

**Registrations are now open for iDEA 2021: Planet, Health and Hope.**

[Click here](#) to secure yourself a ticket.

iDEA 2021: Planet, Health and Hope, will provide you with an honest appraisal of the climate crisis from scientific, medical, cultural and political perspectives.

The conference will also focus on solutions: offering treatment pathways that offer ways to combat planetary health problems, as well as providing psychological approaches to support attendees.

You can expect to learn about health-based approaches, as well as solutions from other sectors— things like carbon drawdown technologies, engineering and legal solutions.

Further details about sessions, speakers and what else you can expect from the conference will be released in the coming weeks, so stay tuned!

**Unfortunately, due to the ongoing border closures associated with COVID-19 restrictions, this year's conference will be held online.**

Doctors for the Environment Australia is a registered not-for-profit organisation. All proceeds from this event will go towards our health- and environment-related projects and campaigns.

A provisional copy of the program can be found [here](#).

**Carol Ride**

—

**SATURDAY, 16 OCTOBER 2021**

Day one of the conference will focus on providing an honest appraisal of the current state of the climate crisis from scientific, medical, cultural and political perspectives. You can expect a range of keynote addresses, workshops and plenaries beginning at 8:30am and continuing until 5:30pm.

—

## **SUNDAY, 17 OCTOBER 2021**

Day two of the conference will focus on solutions: offering treatment pathways that combat planetary health problems, as well as solutions to address the immediate health effects of climate change and environmental degradation on patients.
